The sample to be approved is a representation of what the color that you have chosen may look like on a similar substrate. EasyTrim Reveals makes every attempt to provide an exact color match. However, please be aware that colors may vary slightly from the sample in comparison to the actual production run. Variations may also occur from reflection of light, batch to batch, and the varying nature of pigments & metallics.

Due to the variations mentioned above, EasyTrim Reveals assumes no liability for color variations from the sample to production run.

**Approval Signature:** \_\_\_\_\_
